## Subject Index

---

### Acidity

Catalytic conversion of methanol into light alkenes on mordenite-like zeolites 91

### Acidity

Synthesis and catalytic performance of Fe-Cr-bimetallosilicate having a pentasil pore structure 17

### Acidity

Comparative study of the effects of sodium impurity and amorphisation on the Lewis acidity of  $\gamma$ -alumina 71

### Acidity

Titania-zirconia mixed oxide aerogels as supports for hydrotreating catalysts 45

### Activity

Structure and activity of a CoMo/Al<sub>2</sub>O<sub>3</sub> catalyst upon modification by gamma irradiation 205

### Aerogel

Titania-zirconia mixed oxide aerogels as supports for hydrotreating catalysts 45

### Alkylation

Para-selective alkylation of toluene with methanol over ZSM-5 zeolites 117

### $\gamma$ -Alumina

Comparative study of the effects of sodium impurity and amorphisation on the Lewis acidity of  $\gamma$ -alumina 71

### Ammonia oxidation

Characterization of mixed copper-manganese oxides supported on titania catalysts for selective oxidation of ammonia 181

### Antimony oxide

Oxidation of carbon monoxide on platinum-antimony oxide catalysts 85

### Benzene oxidation

Role of molecular oxygen in the catalytic behaviour of ZSM-5 zeolite in hydrocarbon transformation 131

### Butane oxidation

Role of molecular oxygen in the catalytic behaviour of ZSM-5 zeolite in hydrocarbon transformation 131

### Butene aromatization

Role of molecular oxygen in the catalytic behaviour of ZSM-5 zeolite in hydrocarbon transformation 131

### Butene oligomerization

Role of molecular oxygen in the catalytic behaviour of ZSM-5 zeolite in hydrocarbon transformation 131

### Butene oxidation

Role of molecular oxygen in the catalytic behaviour of ZSM-5 zeolite in hydrocarbon transformation 131

### Carbon dioxide

Hydrogenation of carbon dioxide to C<sub>1</sub>-C<sub>7</sub> hydrocarbons via methanol on composite catalysts 31

### Carbon monoxide oxidation

Oxidation of carbon monoxide on platinum-antimony oxide catalysts 85

### Catalyst characterization (DRIFTS)

Catalytic conversion of methanol into light alkenes on mordenite-like zeolites 91

### Catalyst preparation (crystallization)

Synthesis and catalytic performance of Fe-Cr-bimetallosilicate having a pentasil pore structure 17

### Chromium

Hydrogenation of carbon dioxide to C<sub>1</sub>-C<sub>7</sub> hydrocarbons via methanol on composite catalysts 31

### Co-ZSM-5

Role of molecular oxygen in the catalytic behaviour of ZSM-5 zeolite in hydrocarbon transformation 131

### Cobalt-molybdenum/alumina

Structure and activity of a CoMo/Al<sub>2</sub>O<sub>3</sub> catalyst upon modification by gamma irradiation 205

### Composite catalyst

Hydrogenation of carbon dioxide to C<sub>1</sub>-C<sub>7</sub> hydrocarbons via methanol on composite catalysts 31

### Copper-manganese oxides

Characterization of mixed copper-manganese oxides supported on titania catalysts for selective oxidation of ammonia 181

### Cu-ZSM-5

Role of molecular oxygen in the catalytic behaviour of ZSM-5 zeolite in hydrocarbon transformation 131

**Deactivation**

Catalytic conversion of methanol into light alkenes on mordenite-like zeolites 91

**Deactivation**

Role of molecular oxygen in the catalytic behaviour of ZSM-5 zeolite in hydrocarbon transformation 131

**Decoration of nickel crystallites**

Morphology of coprecipitated nickel/alumina catalysts with low alumina content 107

**Dispersed catalyst**

Thermodynamic hydroconversion of heavy petroleum cuts with dispersed catalyst — a Review 1

**Ethylbenzene dehydrogenation**

Synthesis and catalytic performance of Fe-Cr-bimetallosilicate having a pentasil pore structure 17

**Fe-ZSM-5**

Role of molecular oxygen in the catalytic behaviour of ZSM-5 zeolite in hydrocarbon transformation 131

**Gamma irradiation**

Structure and activity of a CoMo/Al<sub>2</sub>O<sub>3</sub> catalyst upon modification by gamma irradiation 205

**H-ZSM-5**

Hydrogenation of carbon dioxide to C<sub>1</sub>-C<sub>7</sub> hydrocarbons via methanol on composite catalysts 31

**Heavy oil**

Thermodynamic hydroconversion of heavy petroleum cuts with dispersed catalyst — a Review 1

**Hydrocarbon synthesis**

Hydrogenation of carbon dioxide to C<sub>1</sub>-C<sub>7</sub> hydrocarbons via methanol on composite catalysts 31

**Hydroconversion**

Thermodynamic hydroconversion of heavy petroleum cuts with dispersed catalyst — a Review 1

**Hydrodenitrogenation**

Titania-zirconia mixed oxide aerogels as supports for hydrotreating catalysts 45

**Hydrodesulphurization**

Titania-zirconia mixed oxide aerogels as supports for hydrotreating catalysts 45

**Hydrogenation**

Hydrogenation of carbon dioxide to C<sub>1</sub>-C<sub>7</sub> hydrocarbons via methanol on composite catalysts 31

**Hydrotreating**

Titania-zirconia mixed oxide aerogels as supports for hydrotreating catalysts 45

**Iron-chromium silicate**

Synthesis and catalytic performance of Fe-Cr-bimetallosilicate having a pentasil pore structure 17

**Isopropanol dehydration**

Comparative study of the effects of sodium impurity and amorphisation on the Lewis acidity of  $\gamma$ -alumina 71

**Kinetic model**

Para-selective alkylation of toluene with methanol over ZSM-5 zeolites 117

**Lewis acidity**

Comparative study of the effects of sodium impurity and amorphisation on the Lewis acidity of  $\gamma$ -alumina 71

**Light alkenes**

Catalytic conversion of methanol into light alkenes on mordenite-like zeolites 91

**Magnesia**

Stabilized magnesia as a support for nickel methanation catalysts 167

**Metal Salts**

Thermodynamic hydroconversion of heavy petroleum cuts with dispersed catalyst — a Review 1

**Methanation**

Stabilized magnesia as a support for nickel methanation catalysts 167

**Methanol conversion**

Catalytic conversion of methanol into light alkenes on mordenite-like zeolites 91

**Mixed oxides**

Titania-zirconia mixed oxide aerogels as supports for hydrotreating catalysts 45

**Mordenite**

Catalytic conversion of methanol into light alkenes on mordenite-like zeolites 91

**Morphology**

Morphology of coprecipitated nickel/alumina catalysts with low alumina content 107

**Nickel**

Stabilized magnesia as a support for nickel methanation catalysts 167

- Nickel  
Morphology of coprecipitated nickel/alumina catalysts with low alumina content 107
- Nickel  
Effect of the support on the reducibility of high-loaded nickel catalysts 153
- Nickel/alumina  
Morphology of coprecipitated nickel/alumina catalysts with low alumina content 107
- Organometallics

Thermodynamic hydroconversion of heavy petroleum cuts with dispersed catalyst — a Review 1
- Platinum  
Oxidation of carbon monoxide on platinum—antimony oxide catalysts 85
- Propene conversion  
Synthesis and catalytic performance of Fe—Cr-bimetallosilicate having a pentasil pore structure 17
- Reducibility  
Effect of the support on the reducibility of high-loaded nickel catalysts 153
- Selectivity (*para*-xylene)  
Para-selective alkylation of toluene with methanol over ZSM-5 zeolites 117
- Selectivity (alkenes, styrene)  
Synthesis and catalytic performance of Fe—Cr-bimetallosilicate having a pentasil pore structure 17
- Sodium  
Comparative study of the effects of sodium impurity and amorphisation on the Lewis acidity of  $\gamma$ -alumina 71
- Structure  
Structure and activity of a CoMo/Al<sub>2</sub>O<sub>3</sub> catalyst upon modification by gamma irradiation 205
- Structure determination  
Characterization of mixed copper—manganese oxides supported on titania catalysts for selective oxidation of ammonia 181
- Super-critical fluid extraction  
Titania—zirconia mixed oxide aerogels as supports for hydrotreating catalysts 45
- Support effects  
Effect of the support on the reducibility of high-loaded nickel catalysts 153
- Support stabilization  
Stabilized magnesia as a support for nickel methanation catalysts 167
- Surface acidity  
Titania—zirconia mixed oxide aerogels as supports for hydrotreating catalysts 45
- Temperature-programmed reduction  
Characterization of mixed copper—manganese oxides supported on titania catalysts for selective oxidation of ammonia 181
- Thiophene hydrodesulphurization  
Structure and activity of a CoMo/Al<sub>2</sub>O<sub>3</sub> catalyst upon modification by gamma irradiation 205
- Titania  
Titania—zirconia mixed oxide aerogels as supports for hydrotreating catalysts 45
- Titania support  
Characterization of mixed copper—manganese oxides supported on titania catalysts for selective oxidation of ammonia 181
- X-ray diffraction  
Characterization of mixed copper—manganese oxides supported on titania catalysts for selective oxidation of ammonia 181
- X-ray photoelectron spectroscopy  
Characterization of mixed copper—manganese oxides supported on titania catalysts for selective oxidation of ammonia 181
- Zeolites  
Para-selective alkylation of toluene with methanol over ZSM-5 zeolites 117
- Zeolites  
Catalytic conversion of methanol into light alkenes on mordenite-like zeolites 91
- Zeolites  
Hydrogenation of carbon dioxide to C<sub>1</sub>—C<sub>7</sub> hydrocarbons via methanol on composite catalysts 31
- Zeolites  
Role of molecular oxygen in the catalytic behaviour of ZSM-5 zeolite in hydrocarbon transformation 131

**Zinc**

Hydrogenation of carbon dioxide to C<sub>1</sub>–C<sub>7</sub> hydrocarbons via methanol on composite catalysts 31

**Zirconia**

Titania–zirconia mixed oxide aerogels as supports for hydrotreating catalysts 45

**ZSM-5**

Para-selective alkylation of toluene with methanol over ZSM-5 zeolites 117

**ZSM-5**

Hydrogenation of carbon dioxide to C<sub>1</sub>–C<sub>7</sub> hydrocarbons via methanol on composite catalysts 31

**ZSM-5**

Role of molecular oxygen in the catalytic behaviour of ZSM-5 zeolite in hydrocarbon transformation 131
